

RAJENDRA SINGH

Vulnerability Assessment & Penetration Testing

+91-8302678483 | rajendrajra65@gmail.com | linkedin.com/in/rajendra-singh01

Summary

Focused on Vulnerability Assessment and Penetration Testing (VAPT), with hands-on experience in web application and network security. Skilled in identifying vulnerabilities, performing security assessments, and analyzing modern cyber threats, along with working knowledge of log analysis and basic threat monitoring.

Education

B.Tech in Computer Science (Cyber Security)

2024 – 2028

Quantum University, Roorkee (Uttarakhand)

Skills

Tools & Programming: Burp Suite, Nmap, Metasploit, Wireshark, Gobuster, Dirsearch, SQLMap, Python, Bash

Web Security & Monitoring: SQL Injection (SQLi), XSS, Authentication & Session Flaws, OWASP Top 10, SIEM (Basic)

Security Testing: VAPT, Web & Network Testing, Linux Enumeration, Ethical Hacking, Reconnaissance

Experience

Cybersecurity Intern

Nov 2025 – May 2026

Unified Mentor (Remote)

Tools Used: Gobuster, SQLMap, BurpSuite

- Performed web application vulnerability assessment and basic penetration testing.
- Identified issues like SQL Injection, XSS, and authentication flaws.
- Utilized VAPT tools and followed standard penetration testing methodologies.
- Awarded **Letter of Recommendation** by HR Manager, Unified Mentor Pvt. Ltd., for strong technical aptitude and commendable contributions to security monitoring and threat detection projects.

Cybersecurity Intern – Govt. Initiative

June 2026 – July 2026

Amroha Police Cyber Security Internship Program (APCSIP)

Under SP, Amroha Police (U.P.) | Onsite

- Participated in a **government-run cybersecurity program** under the Superintendent of Police, gaining law enforcement perspective on active cybercrime investigations.
- Gained exposure to **dark web investigation**, OSINT methodologies, malware behavioral indicators, and IOC identification used in real cybercrime cases.
- Understood legal SOPs for **digital evidence preservation**, chain of custody, and cybercrime investigation procedures under law enforcement guidance.

Projects

ZeroTrace – Secure Network Monitoring & Intrusion Response Platform | *Python, Scapy, FastAPI*

- Built a full-stack network IDS/IPS detecting **6 attack types** via real-time Scapy packet capture with automated iptables IP blocking in **sub-50ms** and YAML-driven SOAR-style response playbooks.
- Architected **10 decoupled modules** – FastAPI REST API with JWT auth, WebSocket live dashboard, SQLite/PostgreSQL incident logging, and rule-based IDS with configurable YAML signatures.
- Developed **offensive lab module** simulating port scans, brute-force, DDoS floods, and reconnaissance to validate detection modules; integrated AI (Ollama/llama3) for **zero-cost threat explanation**.

Linux Privilege Escalation Automation Toolkit | *Python, Bash, Linux*

- Automated detection of **SUID/SGID binaries, weak permissions, and sudo misconfigurations** – eliminating repetitive manual enumeration during penetration testing workflows.
- Enumerated **cron jobs, services, writable paths, and Linux capabilities** to surface exploitable attack vectors; generated **structured audit reports** with severity levels and remediation steps.

Awards & Certifications

- **Certified LLM Security Professional (CLLMSP) – Red Team Leaders (2026):** Certified in LLM security assessment, prompt injection attacks, AI red teaming, and adversarial testing of large language models. Verify: courses.redteamleaders.com.
- **Certified Online Fraud Prevention Specialist (COFPS) – Hack & Fix Academy (2026):** Officially certified in online fraud detection, prevention strategies, and cybersecurity threat analysis. Credential ID: 4096-2928-4898-1370.
- **TryHackMe – Top 4% Global Ranking:** Completed learning paths including Pre Security, Cyber Security 101, Web Fundamentals, and Junior Penetration Tester – covering networking, Linux, web exploitation, and ethical hacking fundamentals.
